

# Save Sharks With Sophi

My name is Sophi and I am 7½ years old. I LOVE SHARKS!  
I want to help protect them and their environment.

My friend Dr. Neil Hammerschlag and I with a 9-foot Lemon Shark.

A drawing I did of my favorite kind of shark, the Hammerhead.

Saving sharks and protecting our oceans is important because:

- @ Some kinds of sharks are threatened of becoming endangered.
- @ We need to stop people from making shark fin soup.
- @ Sharks are important to our Earth.
- @ We need to stop people from putting garbage in our oceans.
- @ We need to teach fisherman to respect sharks.

**My goal is to raise \$2000 to help shark research.**

For more information on how important shark research is go to  
[www.rjd.miami.edu](http://www.rjd.miami.edu).

Here are some ways you can help me:

1. Donate. Make all checks payable to U of Miami - RJD Program, put my name in the memo and mail it to Kori Bromenshenkel, c/o Naas Chiropractic, 7400 Metro Blvd. Suite 225, Edina, MN 55439. (Your donation by check is tax deductible).
2. Stop by one of my "Lemonade Stands for Sharks" this summer.  
(dates to be announced)
3. Pass this flyer on to your friends and family.

Thanks so much, Sophi Bromenshenkel
